

Quiz Answer Key

Draw a line from the part of the eye to its description:

1. Iris ————— The black circle in the middle of the eye that lets in light
 2. Retina ————— The colored part of your eye that's brown, blue or green
 3. Pupil ————— The back of the eye where the light hits and is turned into signals so the brain can understand what you're seeing
4. It's a good idea to wear these to protect your eyes when it's really sunny outside: _____ sunglasses _____
5. True or false: Your pupils get smaller when it's bright, and larger when it's dark.
