Guy Talk

Instructions: As an intern for the Guy Talk radio show, your job is to help the host answer questions from callers. Choose three of the questions below, do some research at TeensHealth.org, and write a response that's both factual and reassuring.

"Sometimes I feel like I have the incredible shrinking testicles, especially when it's cold. Why do they change size so often?"

"I've noticed that my penis is smaller than the other guys' on my team. Is there something wrong with me? What can I do to make it grow?"

"I get erections in class when I'm not even thinking about sex! What's going on? How can I keep this from happening?"

"I've been having so many wet dreams. I even had one at a sleepover. I've got to figure out how to control them. Any ideas?"

"I am uncircumcised and my friend has been telling me that circumcised is better. Is that true?"

"If you ejaculate a lot, is it possible to use up your sperm?"

"I found a lump in my scrotum. Is this normal?"
