

## Immunity Bingo Terms and Definitions

Note to teacher: Call out these definitions in random order.

A team of organs, tissues, and cells that work together to keep your body healthy.

**immune system**

White blood cells in your body that help fight germs or invaders that can make you sick.

**leukocytes**

A type of germ that can make you sick.

**virus**

Another word for immunization. You get these at the doctor's office to help your immune system.

**shot**

This happens when your immune system overreacts. Some people have these to peanuts or milk.

**allergy**

This means you're protected from a certain kind of germ.

**immune**

The best way you can help your immune system.

**wash hands**

Invaders that attack the immune system. Viruses and bacteria are some examples.

**germs**
