STD IQ 1

☐ ☐ Some STDs can cause death.

☐ ☐ Many people with STDs don’t even know they have them.

☐ ☐ You can’t have more than one STD at one time.

☐ ☐ If untreated, some STDs can increase the risk of getting cancer.

☐ ☐ Abstinence from all sexual contact is the only 100% effective way to prevent STDs.

☐ ☐ Using a condom is as effective as abstinence.

☐ ☐ Using a condom every time can lower your risk of STDs.

☐ ☐ Having sex with many different partners can increase your risk of getting an STD.

☐ ☐ Drugs and alcohol can affect someone’s ability to make safe decisions about sex.

☐ ☐ If your partner gets angry when you bring up STD testing, it’s best to drop the subject.
