

## Money Going Up in Smoke Answer Key

Instructions: If each pack of cigarettes costs \$6, calculate how much a smoker would spend in a year if he or she smoked the amounts listed below. Then write down what you might do with each amount of money.

### 1 Pack Per Week

$$\$6 \times 52 \text{ weeks}$$

Total for year: \$312

### Half a pack a day

$$\$6 / 2 \times 365 \text{ days}$$

Total for year: \$1,095

### 1 pack a day

$$\$6 \times 365 \text{ days} \\ \text{(or } \$1,095 \times 2)$$

Total for year: \$2,190

1. With the amount of money from a pack of cigarettes a week, I could:

---

---

---

2. With the amount of money from a half a pack of cigarettes a day, I could:

---

---

---

3. With the amount of money from a 1 pack of cigarettes a day, I could:

---

---

---
